

# EVOLV<sup>®</sup> Adapter for Smart Cleaner Model ENG-CAEVLV

## 1. OVERVIEW

Engenuity's ENG-CAEVLV adapter supports the cleaning of EVOLV connectors when used with ENG-SS-250 Smart Cleaner. The ENG-SS-250 is an easy to use, effective fiber connector cleaning tool. It is designed for cleaning SC, FC, and ST connectors with 250µm ferrules. The ENG-CAEVLV may be added to extend the cleaning applications to include EVOLV connectors

### Document Status

This is the initial release of this document.

### Product Features

- Supports cleaning of EVOLV connectors
- May be added to ENG-SS-250 cleaners

## 2. APPLICATIONS

### CAUTION

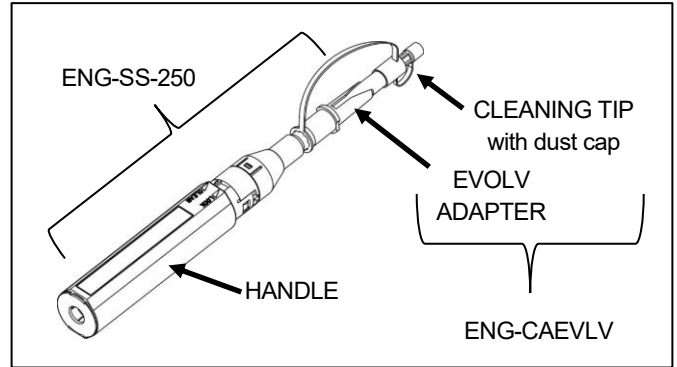

- This product is intended for use as a cleaner for optical connector ferrules. Do not use for any other purpose.
- Do not use this product for cleaning lens type optical ports such as transceivers or reception ports of optical measurement equipment.

## 3. INSTALLATION

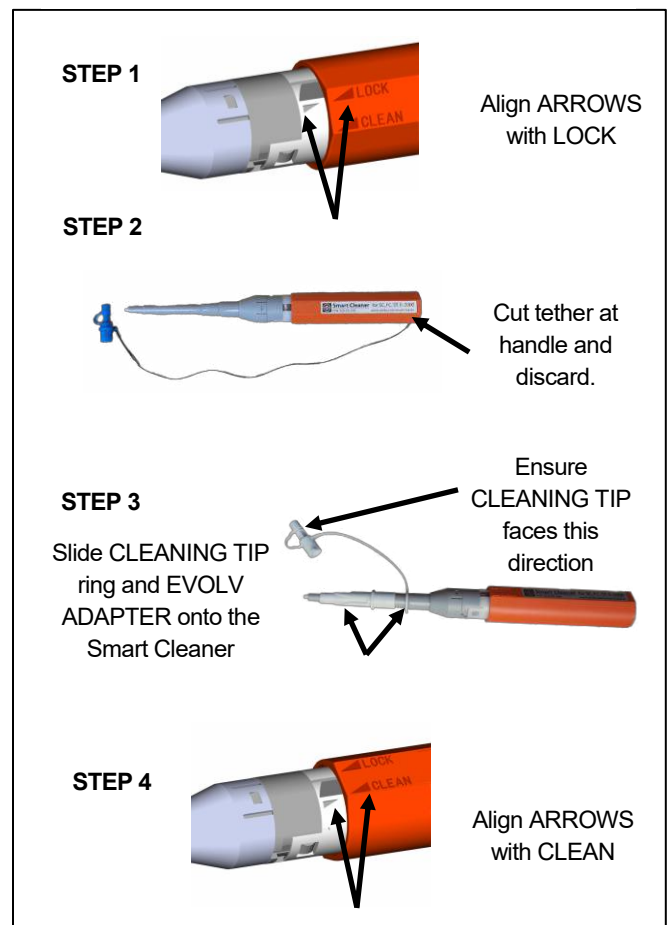

### Adding the ENG-CAEVLV adapter to the ENG-SS-250, Figure 2

- ① Twist the HANDLE to align ARROWS to LOCK.
- ② Cut the tether tied to the existing blue adapter at the handle of the Smart Cleaner and discard.
- ② One at a time, slide the CLEANING TIP ring and EVOLV ADAPTER onto the Smart Cleaner as far as they will go. Ensure the CLEANING TIP is facing in the direction shown.
- ④ Align the arrows with CLEAN.

See Engenuity document 001-02-000034 for use instructions.
